Paul C. Rizzo Associates, Inc. (RIZZO) was awarded a grant from the United States Trade and Development Agency (USTDA) and the Kenya Tea Development Agency, Ltd. (KTDA), to conduct a Feasibility Study for the Integrated Energy Management Project located in Kenya, Africa.

The most important results achieved by this Feasibility Study were as follows:

- Identification of potential small hydropower sites that have been determined based upon a ranking system;
- Implementation recommendations with emphasis on energy usage and availability analysis, economic and financial analysis;
- Energy efficiency study that reviewed and analyze consumption patterns, and provided recommendations for efficiency improvements in the factories;
- Resource assessment that assessed biomass requirements and identifies available land to develop sustainable forestry to meet those needs; and
- Environmental & Developmental Impact Assessment identifying potential negative impacts and developmental benefits to Host country.
