RIZZO'S ELJADEI PUBLISHED IN ENGINEERING STRUCTURES JOURNAL

A paper authored by RIZZO's own Dr. Abdelatey Eljadei has been published in the November 2015 issue of *Engineering Structures*. This journal provides a forum for a broad blend of scientific and technical papers to reflect on the evolving needs of the structural engineering and structural mechanics communities. The journal aspires to a broad and integrated coverage of the effects of dynamic loadings and of the modelling techniques whereby the structural response to these loadings may be computed.

Eljadei's paper entitled, "On the use of fixed point theory to design coupled core walls" demonstrates the use of Fixed Point Theory to optimize the design of coupling beams in coupled core wall systems.

The paper can be viewed on ScienceDirect's website:
