FALL LINE TESTING & INSPECTION TO CONTINUE TESTING OF PANAMA CANAL

Oct 6, 2014 – Pittsburgh, PA – Fall Line Testing & Inspection Panama, S. de R.L., a wholly owned subsidiary of Fall Line Testing & Inspection, LLC, a USA concern and operating unit of PCR Holdings, Inc., headquartered in Pittsburgh, PA, USA, recently received a multi-million dollar schedule extension to complete the testing on the new Third set of Locks on the Panama Canal. Fall Line was originally contracted by the consortium Grupo Unidos por el Canale in December of 2010 to perform all of the concrete and soils testing for the Panama Canal expansion. Fall Line operates two laboratories in Panama (Cocoli on the Pacific side and Colon on the Atlantic) and both labs are ISO 17025 accredited by International Accreditation Services. Fall Line currently employs approximately 50 people on the Canal project. Fall Line's new contract completion date is set for December 2015.
